

Steps to changing Autopilot links on certain pages in BrightEdge Platform:

- 1) Log into BrightEdge Platform: <https://brightedge.com/secure/login>
- 2) On the bottom left hand navigation bar, click 'Settings':

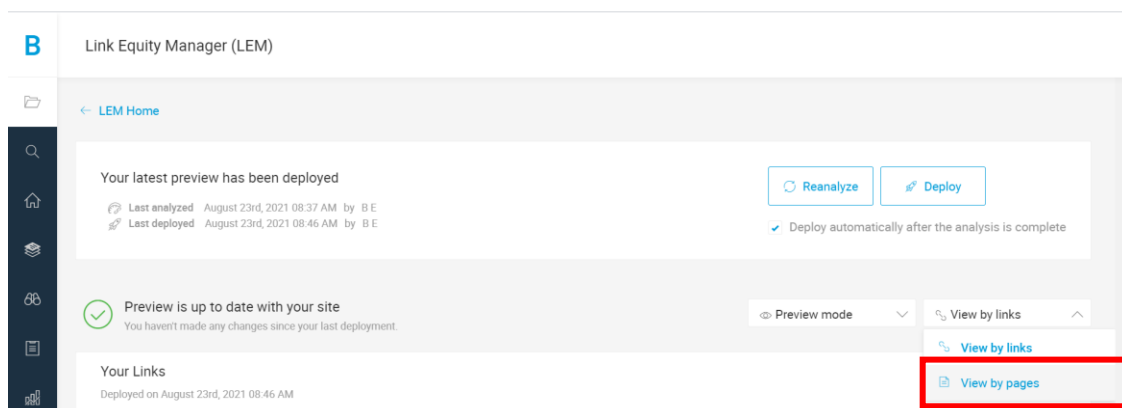

- 3) Scroll down to the *Product Settings* Section and click 'Link Equity Manager'.

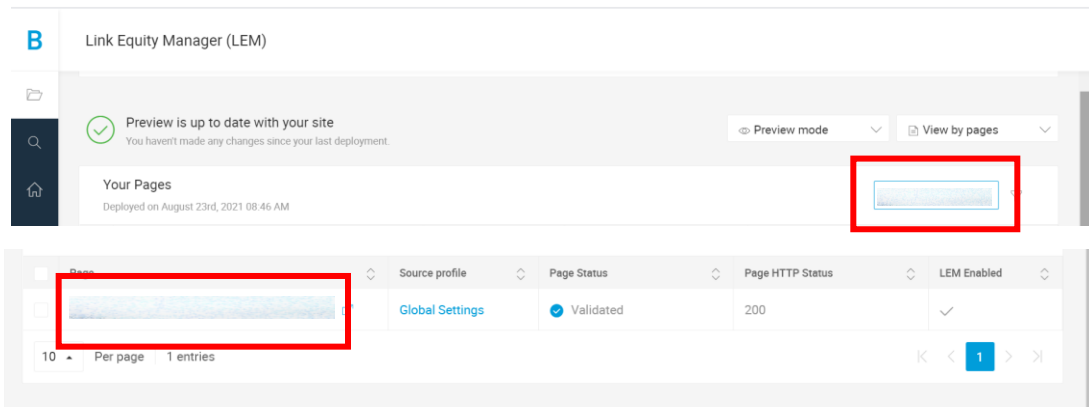

- 4) Click on the button named 'Preview →'

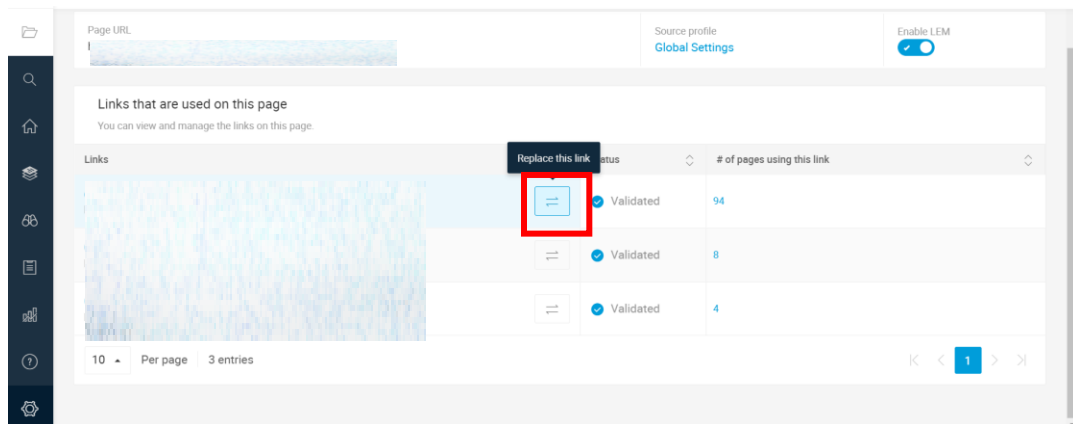

- 5) Select the dropdown 'View by pages'

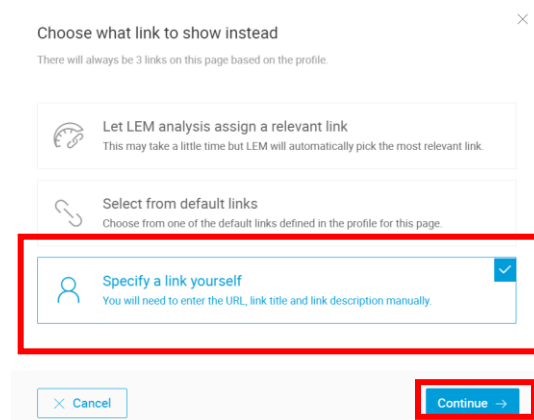

- 6) Click the magnifying glass, paste the target page URL where you want to change the link and then click on the link:

- 7) Click on the double arrows next to the URL you want to change:

- 8) Find the link you would like to replace by specifying:

- 9) Click the checkmark next to link you want to swap in and you can manually add the URL by searching on the magnifying glass or manually “Add a new link” → Click Add and ensure changes are saved.

Specify A Link Yourself

Specify a link yourself to replace the one you'll be removing.

Link

✓ Add

Cancel

- 10) When you are done saving the changes, you must analyze and deploy to see the changes on the site. On the Link Equity Manager settings home page, click on the blue button named '**Preview And Deploy→**'
